

- (3) Five ITAC line charges shall be assessed for each PBX trunk.
- (4) The ITAC line charge assessment for advanced/multi-channel services mirrors the carrier's 911 surcharge assessment for these services (pursuant to ITAC Tariff III. C.C. No. 3).
- (5) "Subscriptions" means a count of the maximum number of interconnected VoIP calls that an end-user may have active at the same time. If the interconnected VoIP provider's retail customer purchases a service (or services) that allows more than one interconnected VoIP call to be made from the customer's physical location at the same time, the number of subscriptions equals the maximum number of interconnected VoIP calls that the customer may have active at the same time. **Do not included subscriptions for business customers in the total in this row.**
- (6) "Subscriptions" means a count of the maximum number of interconnected VoIP calls that an end-user may have active at the same time. If the interconnected VoIP provider's retail customer purchases a service (or services) that allows more than one interconnected VoIP call to be made from the customer's physical location at the same time, the number of subscriptions equals the maximum number of interconnected VoIP calls that the customer may have active at the same time. In the case of a business retail customer which purchases a service (or services) pursuant to a service agreement(s), the number of subscriptions equals the maximum number of interconnected VoIP calls that the customer may have active at the same time under the terms of the service agreement(s) with that customer. In calculating the rate for assessments on business subscriptions, one assessment shall be applied for each five business subscriptions (i.e., the application of the Assessment on business subscriptions shall mirror the application of the Line Charge to centrex lines). **Do not include subscriptions for residential customers in the total in this row.**
- (7) "Wireless lines" means a communications channel between a subscriber and a wireless carrier's network, which would be required to carry the subscriber's traffic and which is capable of providing access to the public switched network. A wireless line does not include lines used for official communications of wireless carriers.
- (8) Multiply Line 8 by carrier's, VoIP provider's wireless provider's uncollectible rate (shown in Rate column) to obtain Line 9. Subtract Line 9 from Line 8 to obtain Line 10.
